EXPERIENCE

Outlier AI - Freelance Coding expert

Aug '24 – July'25

- Delivered high-quality outputs for **LLM evaluation**, **prompt optimization**, and **AI model fine-tuning** using **Reinforcement Learning with Human Feedback (RLHF)**.
- Completed **100+ AI/ML-focused tasks**, including algorithm design, **code generation**, and **model behavior debugging**, earning over **\$3,000** in performance-based payouts.
- Maintained a consistent **4–5-star rating** across diverse AI and software projects, showcasing reliability, fast iteration, and a **bias for execution**.

SKILLS

Programming Languages:

Python, SQL, JavaScript, HTML/CSS, React, Node.js.

AI/LLM Tools:

OpenAI (GPT-4), LangChain, CrewAI, Function Calling, FAISS, RAG.

Backend & APIs:

FastAPI, Flask, RESTful APIs, Docker, AWS.

Data & ML:

TensorFlow, PyTorch, Scikit-learn, SQL.

Soft Skills:

Problem Solving, Rapid Learning, Collaboration, Critical Thinking.

Languages:

Telugu, English and Hindi.

PROJECTS

AI Multi-Agent Supply Chain Optimizer | [Link](#)

Jul'25 – Present

Domain: Supply Chain Management, Multi-Agent AI | Programming Language: Python, Streamlit, CrewAI.

- Built **multi-agent AI system** using **CrewAI** with 4 agents reducing decision-making time from hours to 60 seconds.
- Developed end-to-end logistics platform with Streamlit dashboard, **ARIMA** models, and real-time **APIs** for vendor selection.
- Deployed AI agents using **CrewAI** and **AWS** for orchestration, integrating **LLM reasoning** with **API decisions**.

LLM-Powered Image Caption & Translation Generator | [Link](#)

May'25 – Jul'25

Domain: Computer Vision, Deep Learning | Programming Language: Python, OpenAI API.

- Built a Streamlit Generative AI app for **image captioning** and translation using **OpenAI** and **Google Gemini APIs**.
- Integrated **LangChain RAG** with **FAISS** vector store to improve translation grounding and contextual accuracy.
- Applied **zero-shot and chained prompting techniques** to enhance context-awareness and consistency in outputs.

Lung Cancer Classification Using Multimodal Image Analysis | [Link](#)

Oct'24 – Jan'25

Domain: Machine Learning, Deep Learning | Programming Languages: Python, TensorFlow, Keras.

- Developed a machine learning pipeline for **Lung cancer classification** using medical imaging data.
- Implemented and benchmarked models including **VGG16** and **Random Forest** for image classification.
- Achieved up to 98% accuracy** through optimized preprocessing, model training, and performance evaluation.

CERTIFICATES

- (OCI) Gen AI Professional – Oracle
- IBM Generative AI Engineering– Coursera
- Data Science Job Simulation – British Airways

Sep'25
Apr'24
Dec'23

ACHIEVEMENTS

Amazon ML Challenge

Dec'24

Reached top 10 nationally and presented ML solutions.

Flipkart Grid 6.0 – Participant

Aug'24

Competed in Flipkart's flagship tech innovation challenge, showcasing technical and problem-solving skills.

Newtons Twizard Contest - Programming competition

Jan'23

Achieved a rank of 4943.

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology - Computer Science and Engineering; CGPA: 7.46

Since Aug 2022

Abhyas Junior college

Kadapa, Andhra Pradesh

Intermediate; Percentage: 85%

Apr 2020 - Mar 2022

Bhashyam High School

Kadapa, Andhra Pradesh

Matriculation; Percentage: 95%

Apr 2019 - Mar 2020
